**Violence against Women**

Stanley G. French 2018-10-18 This is the first anthology to take a theoretical look at violence against women. Each essay shows how philosophy provides a powerful tool for examining a difficult and deep-rooted social problem. Stanley G. French, Wanda Teays, and Laura M. Purdy, all philosophers, present a familiar phenomenon in a new and striking fashion. The editors employ a two-tiered approach to this vital issue. Contributors consider both interpersonal violence, such as rape and battering; and also systemic violence, such as sexual harassment, pornography, prostitution, and violence in a medical context. The editors have further broadened the discussion to include such cross-cultural issues as rape in war, dowry deaths, female genital mutilation, and international policies on violence against women. Against this wide range of topics, which integrate personal perspectives with the philosophical, the contributors offer powerful analyses of the causes and effects of violence against women, as well as potential policies for effecting change.

**Men's Violence Against Women**

Christopher Kilmartin 2013-05-13 This text offers a balance of clinical and social psychological theory and research, as well as prevention and intervention techniques with the purpose of understanding and ultimately ending gender-based violence. The authors address several forms of violence, including rape, intimate partner violence, stalking, and sexual harassment in a contemporary linguistic style carefully crafted to avoid victim blaming. Although most men do not perpetrate violence against women, such violence is not a “women’s” issue; it will take the strength and courage of both women and men to solve this human issue. This book moves full circle in its coverage of the topic as it explores the silent epidemic of men’s violence against women, the grave consequences of this violence on both individuals and society, and the historical and current foundations that serve to both criminalize and tolerate men’s violence against women. The authors describe a variety of efforts to treat both offenders and victims highlighting both their vital importance and their insufficiency in preventing violence. The final part of the book contains descriptions of model violence prevention approaches and techniques for implementing these programs. Readers are empowered as they discover how they can be part of the solution. Men’s Violence Against Women is intended as a text for courses in gender-based violence in a variety of disciplines including psychology, sociology, and women’s, men’s, and/or gender studies. The book is also a valuable resource for college and community gender-based violence prevention and intervention program providers.

This important resource will help young people recognize sexism and sexist language, learn how to respond when they find themselves on the receiving end of sexist comments, and where they can go to report sexist behaviors or to get help. **Program Evaluation and Family Violence Research**-Sally K. Ward 2014-05-22 Understand and evaluate family violence programs for your community! Twenty years ago, the major issue in creating interventions to prevent domestic violence was persuading the courts, the funding agencies, and society that domestic violence was a serious problem worthy of time, trouble, and money. Now that the importance of domestic violence has been established, we need safe and effective ways to evaluate those interventions to see which ones are working and how they can be improved. Program Evaluation and Family Violence Research brings together some of the best minds in the field discussing such vital evaluation issues as policy implications, alternative designs for evaluation studies, and ethical concerns. This comprehensive book approaches the vexed question of evaluation with compassion as well as scientific rigor. Clearly, traditional double-blind studies and control groups are difficult to conduct when family violence is the subject; it is ethically indefensible to sit back and watch abusers hurt their mates or children when interventions are available. Yet finding usable methods of program evaluation is also essential. Program Evaluation and Family Violence Research confronts these questions and discusses practical ways to evaluate a variety of domestic violence programs. Program Evaluation and Family Violence Research draws on years of experience to address the difficult questions raised, including: going beyond evaluating program effectiveness to analyze why and how interventions help change behavior creating new research designs to adapt to the unique concerns of the family violence field using meta-analysis for program evaluation research determining the interaction between research and program results identifying barriers between community activists and social scientists that may impede research Program Evaluation and Family Violence Research offers fresh and creative ways to do program evaluations, guarantee subjects’ physical and emotional safety, and make good science humane.

**Building Strengths and Skills**-Jacqueline Corcoran 2004-09-02 This is a much-needed practice book that demonstrates how helping professionals can emphasize their clients’ resilience, strength, and capacities, rather than focusing on pathology or deficits. It offers an integrative practice model for both assessment and intervention that interweaves strengths-based (specifically solution-focused therapy and motivational interviewing) and skills-building (cognitive-behavioral) approaches. In the strengths-and-skills-based model, helping professionals assume that clients possess the necessary capacities to solve their own problems, transforming the therapeutic relationship into a collaboration focused on bolstering motivation and resources for change. When these resources are exhausted or when deficits become a substantial barrier, then practitioner and client work to develop an individualized skills-building plan. A wide range of examples, written by Jacqueline Corcoran with experts from different fields of practice, clearly demonstrate how the model can be applied to individuals and families struggling with behavior problems, depression, substance abuse, anxiety, violence, and abuse, so that both strengths and skills maximize the client’s success. This innovative, dynamic resource is a must have for practitioners across the helping, social service, and mental health professions.

Strengthening Systems to Prevent Intimate Partner Violence and Sexual Violence - Pat Conway 2013-10-31 Over the past 25 years, developing coordinated responses to intimate partner violence and sexual violence has improved both perpetrator accountability, and victim safety and self-determination. However, preventing intimate partner violence and sexual violence from occurring is beyond the ability of any one type of organization. Preventing this violence requires a network of individuals, groups and organizations who coordinate and assess their efforts on an ongoing basis. This volume provides theoretical and practical guidance for the development of state and local prevention systems that hold the potential to eliminate persistent social problems. The development of prevention systems was informed by the data-driven public health model, systems theory and the ecological systems perspective. Strengthening Systems to Prevent Intimate Partner Violence and Sexual Violence offers guidance on how to gain participation of the right partners in developing a prevention system, and how to focus the work of that system on the critical areas of planning, implementation and capacity building. The guidance, resources and experience shared in this important collection will be invaluable to all those working towards the prevention of intimate partner violence and sexual violence. This book is based on a special issue of the Journal of Family Social Work.

Handbook of Gender Research in Psychology—Joan C. Chrsler 2010-03-12 Donald R. McCreary and Joan C. Chrisler The Development of Gender Studies in Psychology Studies of sex differences are as old as the ?eld of psychology, and they have been conducted in every sub?eld of the discipline. There are probably many reasons for the popularity of these studies, but three reasons seem to be most prominent. First, social psychological studies of person perception show that sex is especially salient in social groups. It is the ?rst thing people notice about others, and it is one of the things we remember best (Fiske, Haslam, & Fiske, 1991; Stangor, Lynch, Duan, & Glass, 1992). For example, people may not remember who uttered a witty remark, but they are likely to remember whether the quip came from a woman or a man. Second, many people hold ?rm beliefs that aspects of physiology suit men and women for particular social roles. Men’s greater upper body strength makes them better candidates for manual labor, and their greater height gives the impression that they would make good leaders (i. e., people we look up to). Women’s reproductive capacity and the caretaking tasks (e.g., breastfeeding, baby minding) that accompany it make them seem suitable for other roles that require gentleness and nurturance. Third, the logic that underlies hypothesis testing in the sciences is focused on difference. Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ.

Violence Against Women—Kathryn Roberts 2018-12-15 Annually, approximately 66,000 women are violently killed in countries around the world. While historically these crimes were grouped into the general category of homicide, femicide, the murder of women because of their gender, is now being recognized as a unique issue and a hate crime. However, some assert that the fact that 80 percent of murder victims are male suggests that the issue of femicide is being blown out of proportion. This volume explores the forms femicide takes around the world and potential means of combating it, and discusses the varying perspectives on the usefulness of its categorization.

Social Work Treatment—Francis J. Turner 2011-03-15 First published in 1974, Social Work Treatment remains the most popular and trusted compendium of theories available to social work students and practitioners. It explores the full range of theoretical approaches that drive social work treatment and knowledge development, from psychoanalysis to crisis intervention. This treasure trove of practice knowledge equips professionals with a broad array of theoretical approaches, each of which shine a spotlight on a different aspect of the human condition. Emphasizing the importance of a broad-based theoretical approach to practice, it helps the reader avoid the pitfalls of becoming overly identified with a narrow focus that limits their understanding of clients and their contexts. This sweeping overview of the field untangles the increasingly complex problems, ideologies, and value sets that define contemporary social work practice. The result is an essential A-to-Z reference that charts the full range of theoretical approaches available to social workers regardless of their setting or specialty.

From Hate Crimes to Human Rights—Mary E Swigonski 2014-05-01 Fight for the human rights of LGBT individuals with strategies from this powerful book! From the intimate horror of domestic violence to the institutionalized heterosexism of marriage laws, this volume takes an unsparring look at the interconnections of prejudice and hate crimes in the lives of LGBT individuals. Bringing together original research and solidly grounded theory, From Hate Crimes to Human Rights: A Tribute to Matthew Shepard also offers fresh strategies so you can work effectively for social change. This moving, thoughtful volume begins with a friend’s memoir of the murdered Matthew Shepard; this intimate glimpse is powerful testimony that hate crimes affect individuals, not just symbolic martyrs. From Hate Crimes to Human Rights drags hidden homophobia from the closet and examines it with clean, incisive intelligence. It tackles taboo topics, including: what the Bible really says about homosexuality how minority cultures sometimes foster hatred against the LGBT individuals in their midst why child welfare services don’t protect LGBT youth from peer violence how internalized LGBT self-hatred can be expressed as domestic violence Hate crimes do not occur in a cultural vacuum. From Hate Crimes to Human Rights searches out the roots of hatred and suggests ways to eradicate them, drawing on economics, theology, and linguistics as well as sociology, history, and political science. Specific suggestions include: how to use language as a social and cultural change strategy what individuals and
universities can do to promote human rights how to make use of the intersection of difference and tolerance to prevent hate crimes why equal treatment for LGBT individuals is a human rights issue, not a special-interest advantage From Hate Crimes to Human Rights provides powerful explanations of the ways hatred generates hate crimes and proposes positive action you can take to validate human rights. A Statement from the Authors One of the premises of this book is that if we want to progress from hate crimes to human rights, we must learn to respect, honor, and celebrate diversity. The chapter authors exemplify a rainbow of ethnicities, sexual orientations, and gender identities. Each of us is committed to advocate for human rights and to work to end hate crime. Toward those ends, the royalties from the sale of this book will go directly to a memorial fund that has been established at Monmouth University in Matthew Shepard’s honor. The proceeds from that fund will be used to support students in their preparation for human rights advocacy.

The first book to offer a glimpse of this topic from a global perspective, it adopts a unique approach—case background and critical analysis. As such it is a valuable source of reference for scholars, clinicians, and law enforcement practitioners wanting to gain a better understanding of this type of violent offender.

Violence against Women in Politics—Mona Lena Krook 2020-07-16 Women have made significant inroads into political life in recent years, but in many parts of the world, their increased engagement has spurred attacks, intimidation, and harassment. This book provides the first comprehensive account of this phenomenon, exploring how women have come to these experiences a naming: violence against women in politics. Tracing its global emergence as a concept, Mona Lena Krook draws on insights from multiple disciplines—political science, sociology, history, gender studies, economics, linguistics, psychology, and forensic science—to develop a more robust version of this concept to support ongoing activism and inform future scholarly work. Krook argues that violence against women in politics is not simply a gendered extension of existing definitions of political violence privileging physical aggressions against rivals. Rather, it is a distinct phenomenon involving a broad range of harms to attack and undermine women as political actors, taking physical, psychological, sexual, economic, and semiotic forms. Incorporating a wide range of country examples, she illustrates what this violence looks like in practice, catalogues emerging solutions around the world, and considers how to document this phenomenon more effectively. Highlighting its implications for democracy, human rights, and gender equality, the book asserts that addressing this issue requires ongoing dialogue and collaboration to ensure women’s equal rights to participate—freely and safely—in political life around the globe.

**We are the Work**

Dick Bathrick 2014 "We Are The Work" is about how Men Stopping Violence (MSV), a small, social justice nonprofit, got to do big things, about the intriguing characters that formed and were informed by MSV's mission, about how men and women learned to work in solidarity to address men's violence against women (VAW), about their successes and failures, the lessons which became the Core Principles that guide their work. One of those principles, We Are the Work, means that no matter where or when you enter the struggle to end VAW you have to start and stay with examining yourself. You have to identify both your strengths and your "blind spots." And it's not about whether or how you transcend those "blind spots." It's that you have to know that they're there and how you will address them. This book tells the stories that illuminate those personal and institutional challenges. The rhetoric and analyses used to tackle this thorny issue are only part of the story. "We Are the Work" gets to how all of that talk about eliminating violence against women stands up to real-world challenges. Here are the take-home lessons from 30 years in the trenches of social justice work.

**Translating International Women's Rights**

Susanne Zwingel 2016-08-13 This book looks at the centerpiece of the international women's rights discourse, the Convention on the Elimination of all Forms of Discrimination against Women (CEDAW), and asks to what extent it affects the lives of women worldwide. Rather than assuming a trickle-down effect, the author discusses specific methods which have made CEDAW resonate. These methods include attempts to influence the international level by clarifying the meaning of women’s rights and strengthening the Convention’s monitoring procedure, and building connections between international and domestic contexts that enable diverse actors to engage with CEDAW. This analysis shows that while the Convention has worldwide impact, this impact is fundamentally dependent on context-specific values and agency. Hence, rather than thinking of women’s rights exclusively as normative content, Zwingel suggests to see them as in process. This book will especially appeal to students and scholars interested in transnational feminism and gender and global governance.
